

Agenda

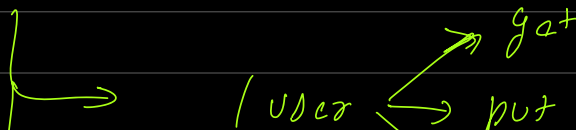

- ① Express
- ② Express + API
- ③ HTTP method \rightarrow get, post, delete, patch, put
- ④ postman
- ⑤ middle ware

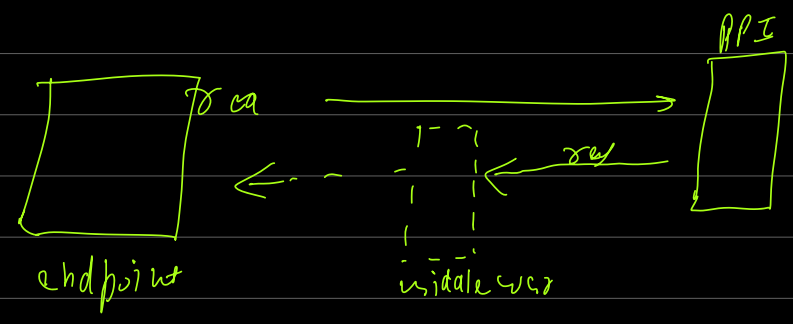

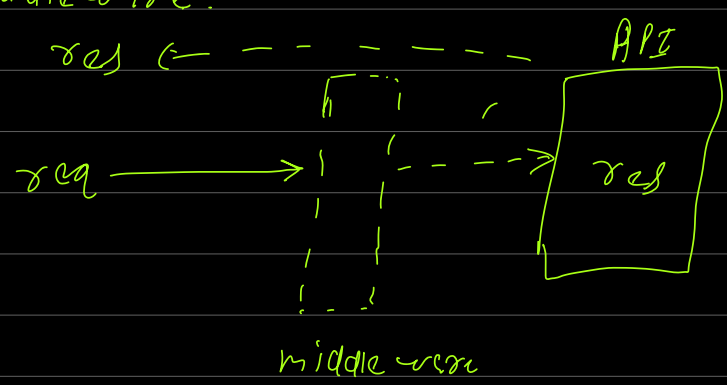

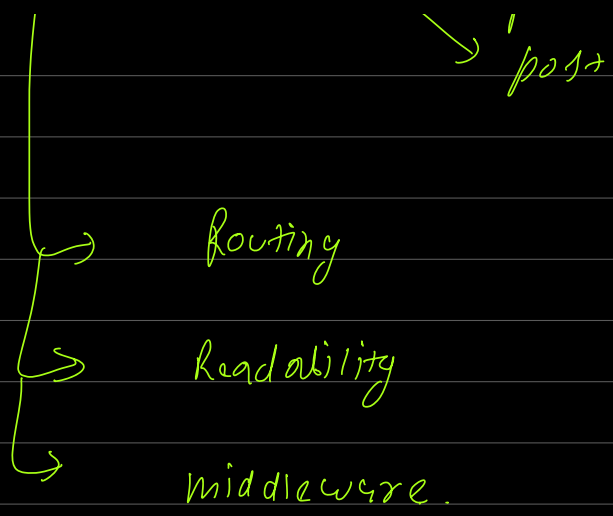

API

\rightarrow

Express

HTTP

- get →
- post →
- delete →
- put → complete replace resource
- patch → specific bit-point update.

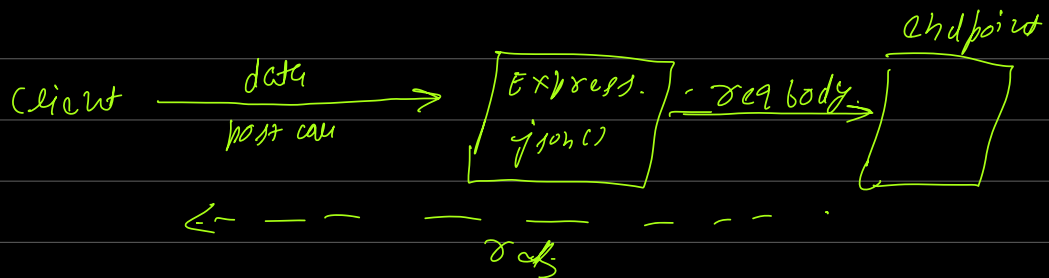

app.use (express.json ())

purpose : express app to understand and work with json data in request.

→ It will automatically parse about incoming request.

Express.json ()

Built in middleware

app.use (for all request)

Question

post API

payload {

cardtype : 'visa'

user : '@rajneesh' ←

purchase : 'iphone'

}

→ DD
